

You are going to print out your Car, Student, Planet and Custom classes in their entirety.

You are not going to print out parts of your tester class. I simply can't check all of that!!!!

1. Make a cover page as follows;

Set Font Consolas 12

Name : Logan Stone

Sauce Code: 12

Period 6 APCS

Assignment 8

Mr. Hanley

2/1/2019

2. Print out your Car.java in its entirety from NetBeans.

Please use consolas font 12 and wrap lines and get it to fit in as few pages as possible. (I am a fan of .25 margins all around) Use double sided if printing to the 2100 printer in room 134. Room 129 does not have a double sided printer. ;-(

3. Highlighting

- a. Take out a yellow highlighter, highlight all the static variables and any place a static is changed or altered
- b. Take out a pink highlighter, highlight any throw exception command.
- c. Take out a blue highlighter, highlight your toString method

4. Print out your Student.java in its entirety from NetBeans.

Please use consolas font 12 and wrap lines and get it to fit in as few pages as possible.

5. Repeat Highlighting from step 3

6. Print out your Planet.java in its entirety from NetBeans. Please use consolas font 12 and wrap lines and get it to fit in as few pages as possible.

7. Repeat Highlighting from step

8. Print out your <YourCustomClass>.java in its entirety from NetBeans. Please use consolas font 12 and wrap lines and get it to fit in as few pages as possible.

9. Repeat Highlighting from step

10. Staple in order with your cover page on top, Car, Student, Planet and Custom.
